

Lead Your Lifestyle

We provide reliable construction and engineering services with a focus on quality work, timely delivery, and complete customer satisfaction. We build with care, honesty and commitment.

OUR PROFESSIONALS

Ravinsh Srivastava - Founder

ASVA builds with trust, safety, and innovation at its core. From a bold vision to becoming a young industry leader, we continue to raise construction standards in India. We don't just build projects—we build a safer, stronger nation.

Shivesh Choudhary - CEO

“Welcome to ASVA. We are driven by integrity, quality, and innovation. What started with limited resources has grown through trust, teamwork, and a relentless focus on excellence. We believe safety, precision, and client satisfaction are non-negotiable. From BIM modelling to fire protection and infrastructure, we deliver with purpose. Let's build the future—together.”

About Us

Established in 2025, ASVA is a multidisciplinary contracting and engineering company registered at Siwan, Bihar, with offices in New Delhi and Lucknow. The company is committed to delivering economical, professional, and reliable construction and engineering solutions.

Founded by Mr. Ravinsh Srivastava and Mr. Shivesh Choudhary, ASVA is backed by over two decades of combined experience across leading organizations such as NAFFCO, Shapoorji Pallonji, ITD Cementation, and WAAREE Group. The founders bring strong international exposure, having successfully contributed to multi-million-dollar projects in the Middle East.

With expertise in project execution, contracts, and resource management, ASVA is dedicated to quality, efficiency, and building long-term client trust.

1. CONTRACTING SERVICES

Column Erection

Beam Installation

Bracing & Alignment

Bolt Tightening

1) Structural Steel Fabrication, Coating & Erection

Structural Steel Fabrication

At ASVA Group, we deliver precision-driven structural steel fabrication for buildings and industrial structures. All components are fabricated in accordance with approved drawings to ensure strength, accuracy, and long-term performance.

Welding & Assembly

Our skilled team performs welding and assembly in line with approved procedures, ensuring strong joints, precise fit-up, and seamless on-site installation.

Pre-Construction Planning

We review drawings, method statements, and ITPs, and conduct site surveys, risk assessments, and mobilization planning to ensure smooth project execution.

Material Verification & Handling

All materials are verified for member markings, quantity, and quality. Safe unloading, storage, and handling are carried out in accordance with established procedures.

Erection Sequence

Steel members are erected as per the approved sequence using appropriate lifting equipment. Alignment, level, and plumb are carefully maintained throughout the process.

Protective Coating & Painting

We apply protective coatings and painting systems to safeguard steel structures against corrosion, weather, and environmental exposure.

2) Passive Fire Protection

Fire Rated Ducts (Shield Your Ducts. Contain the Fire)

Fire-rated duct coatings create a protective barrier, stopping flames and smoke from spreading through ventilation systems.

Firestop Sealant (Seal Every Gap. Stop Every Flame)

Fire sealants block fire, smoke, and toxic gases at critical joints and penetrations — protecting lives and property.

Structural Steel Fire Protection (Protecting Steel. Preserving Strength)

Cementitious coatings provide a durable thermal barrier, while intumescent paints expand into an insulating char—together ensuring structural steel remains strong against fire.

Cable coating (Protect Your Power, Stop the Flames)

Fire-rated cable coatings are designed to safeguard electrical cables and associated infrastructure. This specialized coating system provides effective resistance against fire exposure, significantly reducing the risk of cable failure and preventing potential property loss due to fire damage.

Seal, Insulate Protect

Duct insulation and adhesives enhance energy efficiency, safety, and durability in every HVAC system.

3) Man Power Services

We are a technology-driven recruitment platform dedicated to simplifying hiring. By combining a wide talent network with an efficient digital interface, we provide transparent and reliable staffing solutions for both employers and job seekers.

4) Road Infrastructure

Road Infrastructure Development & Markings

We execute internal and external road construction works including subgrade preparation, paving, and finishing, along with clear and durable lane marking to ensure safe traffic movement and compliance with standards.

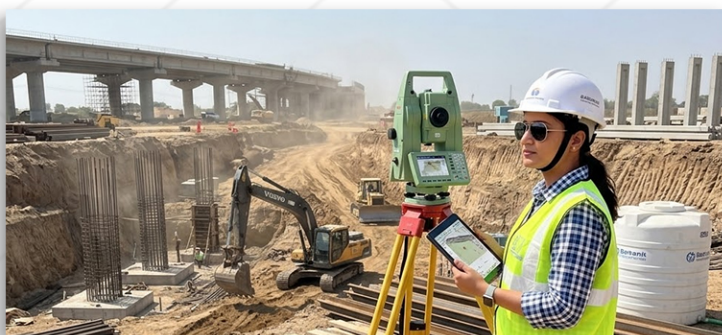

- THERMOPLASTIC PAINT.
- CRASH BARRIERS (MBCB, ROLLER BARRIER)
- ROAD SIGNANGES
- OVERHEAD AND CANTILEVER TYPE GANTRY
- MEDIAN AND BARRIER PAINTS
- DIVERSION BARRIER FOR UNDER CONSTRUCTION SITE.
- SPEED CAMERA AND SPEED RADAR GANTRY.
- PGR (PEDISTRAIN GUARD RAIL REFLECTOR.)

5) Land Survey Services

Best Quality Service

Accurate and reliable land surveying services with cutting-edge technology and experienced professionals for precise results. To operate consistently with the clients so that their projects will stand the test of time. We are always committed for development. Client Satisfaction is always our top priority.

- TOPOGRAPHIC SURVEY
- CONTOUR MAPPING
- HYDROGRAPHIC SURVEY
- GROUND PENETRATING RADAR
- LEVELNESS TEST
- ALIGNMENT CHECK
- FLATNESS TEST
- DATUM VERIFICATION

2. ENGINEERING SERVICES

1) BIM Modelling

Architectural & Structural BIM Modelling

We develop accurate 3D BIM models for architectural design and structural systems. Our models clearly represent building form, layout, and structural components, supporting design development and construction planning.

Design Coordination & Clash Resolution

We coordinate architectural layouts with structural elements to identify and resolve design conflicts at early stages. This helps avoid site issues, reduce rework, and ensure smooth project execution.

Construction Documentation

We prepare complete architectural and structural drawings directly from BIM models, including plans, sections, elevations, details, and schedules, ensuring clarity, consistency, and alignment with project requirements.

Quantity Take-off & BOQ

We extract precise quantities for architectural and structural works from BIM models, supporting accurate cost estimation, tendering, and effective budget control.

As-Built & Scan-to-BIM

We develop accurate as-built BIM models based on site records or laser scan data. These models reflect actual construction conditions and support facility management, renovations, and future expansion.

2) Engineering Drafting - AutoCAD

Architectural & Structural Drafting

We provide accurate AutoCAD drafting services for architectural layouts and structural systems. Our drawings clearly convey design intent and construction details, supporting effective planning and smooth execution on site.

Design Coordination & Drafting

We coordinate architectural and structural drawings to ensure proper alignment of layouts, grids, levels, and building elements. This process helps identify inconsistencies early and reduces coordination issues during construction.

Construction Documentation

We deliver complete construction documentation prepared in AutoCAD, including plans, sections, elevations, details, and schedules. All drawings are developed with clarity and in accordance with project requirements.

Shop Drawings & Detailing

We develop detailed shop and fabrication drawings for architectural and structural components, supporting accurate fabrication, installation, and efficient site execution.

As-Built Drawings

We prepare as-built drawings based on site updates and redline information, reflecting actual construction conditions and supporting handover, maintenance, and future modifications.
